The Project

The "[Religion and Values in Central and Eastern Europe](#)" conference, the closing conference of the EU Framework 6 supported international network (Religions and Values in Central and Eastern Europe Research Network - REVACERN). The web brings together 13 institutions of 10 countries (Austria, Bulgaria, Czech Republic, Croatia, Hungary, Poland, Romania, Slovakia, Slovenia and Ukraine), all involved in religion related researches. The network - coordinated by the Department for the Study of Religion of the University of Szeged - tackles the most important religious issues and processes, as well as value changes. It is an important part of the project to make the results of researches made in CEE countries available at international level, incorporating them into a broader scientific communication. Supporting relevant work of young researchers and building up a researcher social network for them is also in the focus point of the project.

Issues Concerned

REVACERN would like to contribute to the religion and value related academic and political discourse in the region with the following issues:

Religious and value trends 20 years after the change of the regime

New religious phenomena and movements

Legal regulation of the religious sphere

Challenges of the orthodox Europe

Religion and education

Religion and nation - motivation and reconstruction

REVACERN

RELIGIONS AND VALUES:
CENTRAL AND EASTERN EUROPEAN RESEARCH NETWORK

„The European Union is open to tackle religion related issues and values of the societies of the member states”

Objective of the Conference

The objective of the conference – organized by the Department for the Study of Religion of the University of Szeged and its partners – is to involve the experts of REVACERN, politicians and policy makers of the relevant issues in a dialogue in order to elaborate common results that can serve as guidelines to tackle religion and value related issues of the CEE region, and hopefully other regions of the EU. The funding documents of the EU consider religious freedom as a fundamental human right at the highest level, and they are on the side of religious neutrality, nevertheless, the European Union is open to tackle religion related issues and values of the societies of the member states. The generous support given to our project REVACERN is a proof of this interest and also the expectation to have scientifically correct, politically relevant and actual pieces of information and guidelines at the disposal of decision makers. Each of the above mentioned themes has relevancy in a social and political field in which the peculiarities of the region are evident and towards which different political decision and view changes are necessary.

Key Speakers (subject to change)

»Balog Zoltán – Head of the Hungarian Parliament’s Committee for Human Rights, Minority, Civic and Religious Affairs (opening speech)

»Prof. em. DDr. Paul M. Zulehner (University of Vienna) – representative of the REVACERN research network
